

## Power Adapter with USB Plug

Lone Star Aviation's Power Adapter USB kit includes (1) power adapter, (1) 28/14 to 5 volt USB plug compatible with any USB device. The USB Plug was Tested to D0160G that will power your aircraft's avionics and will survive any mission at hand. The dc Plug design includes a dc converter 28/14v to 5 volts and is compatible with Lone Star's Cigarette Lighter, ( Power Adapter) and all 5v USB devices.

Perfect for charging cell phones, i Pads 1,2,3,4, AIR, PR0, i Pods, GPS, PDA, Laptop and many consumer 5 volt electronic devices. This is a kit that comes with a FAA-TSO Approved Cigarette lighter power adapter and plug-in USB 5 volt converter tested to RTCA D0160G standards.

For 12 volt AIRCRAFT:

If your aircraft runs on 12 volt you will not need an additional dc converter to operate 12V equipment with your Power Adapter and it comes with a rubber cap marked as DC-12V.

For 28 volt AIRCRAFT:

Please note, the USB Plug is able to converter 28V to 5 volt

output without additional equipment. However, in order to power most 12 volt consumer electronic devices you will need a Converter to get 12V output. Lone Star Aviation has two great models to choose from, either can be easily added to your order.

We also offer as an optional cap marked as 28 volt for customers who wish to utilize the USB charging feature in their 28 volt aircraft without the option of powering 12 volt equipment. If this is the case for you, please note this by selecting the 28 volt model in the drop down menu.

For more information on either converter please check the .PDF documents below:

**Price:** \$175.95

**SKU:** LS03-05025-USB

**Categories:** [DC/DC Converters](#), [iPad/EFB](#)
