

iPad-USB Lightning Cable, Ruggedized

Lone Star Aviation's NEW iPad lightning cables were designed to give the aircraft industry a ruggedized cable qualified to D0160G airborne test procedures.

The NEW iPad cable incorporates a high strength jacket, a layer of wire mesh shielding, a second layer of foil, reinforced cable boots and most significant is a (20 gauge) (power conductor) that charges (two, three times) the standard rates of a generic iPad cable.

The part numbers for the NEW series is LS03-05037, for the straight cord and LS03-05038 for the coiled cord, both are (1M) in length. Cable have the standard Type A USB connectors compatible to any USB-A device used in our industry.

TEST REPORTS are available for the following TESTS: Flammability, Magnetic Effect, Audio Susceptibility, RF conductivity to insure the cables will not produce RF interference and are qualified to aviation standards.

Compatible with our MS-USB iPad Kit, LS03-05105, Multi-PORT,

LS03-05023, USB plug, LS03-05021, Multi-VOLT, LS03-05005 and MS-USB iPad charger, i.e. the LS03-05050-B.
