

Commander 2900

Panel DZUS Mounted

The Commander 2900 is a desktop GPS docking station designed for DZUS mounted GPS and airborne radio transceivers. The docking station is a training tool that allows the pilot to explore basic to advanced GPS features and functionality in a non-flying environment.

The Commander 2900 Docking Station is a valuable tool for avionics to upgrade firmware, bench work, or initial setup. The 2900 station is a universal model expandable to other GPS, MFD's, simulator environments.

SET-UP: Home, office, training centers:

- Easy to set-up, defaults into a simulation mode.

GPS Training:

- Learn basics to advanced GPS functionality .
- Simulate a flight in a non-flying environment .
- Master Flight Plans, Fly trips, set-up functions.
- Enter way points, NAV points, emergency plans.

Maintenance:

- Update KLN-900 data base with subscription.
- Update firmware, initialize, set-up, testing.
