Database Subscriptions and Data Link Weather**

**Honeywell**

# Wingman Services

---

Wingman Services is your comprehensive, one-stop shop for all the services related to Honeywell's Bendix/King products. From database subscriptions to data link weather, Wingman Services ensures that General Aviation pilots have the best, most current information available in the cockpit.

The Honeywell Bendix/King Web site, [www.bendixking.com](http://www.bendixking.com), features in-depth product information, in addition to complete descriptions of all subscriptions offered by Wingman Services. From the home page, click on "Wingman Services" to review the latest pricing (subject to change), data link traffic and weather information, and database subscription details.

Now you can update most GPS subscriptions via the Internet, and save 20- to 35-percent over diskette and cartridge subscriptions! Download any time, from any location. See page 8 for simple download instructions.

If you have any questions regarding Wingman Services, or would like to place an order, call us at 800-247-0230 or 913-712-3145.

## Database Coverage Map

# Internet Database Download Instructions

---

Want to download your subscription online? It's simple, immediate and cost-effective. Take advantage of our Web subscriptions by following the step-by-step instructions below:

## GPS Database Loader Program

Read the following instructions, then download and install the GPS Database Loader program from the Web site. (Found under **Wingman Services** online.)

## Database Availability

The GPS Database Loader works with the following Honeywell GPS units:

<b>KLN 35A</b>	<b>KLN 90B</b>
<b>KLN 89</b>	<b>KLN 94</b>
<b>KLN 89B</b>	<b>KLX 100</b>
<b>KLN 90</b>	<b>KLX 135A</b>
<b>KLN 90A</b>	<b>KLN 900</b>

You cannot use the GPS Database Loader program for diskette-based database subscriptions.

## Computer Requirements

The GPS Database Loader is a 32-bit program, compatible with Microsoft Windows 95, 98, Millenium Edition (ME), NT versions 3.51/4.0, 2000, XP or higher.

The Windows-based GPS Database Loader is a replacement for the DOS-based NETLOAD.EXE program. (The old NETLOAD.EXE program will continue to be included in download packages if you choose to use DOS.)

## Installation

**To install the GPS Database Loader, perform three simple steps:**

- 1) Download the GPS Database Loader installation program onto your computer's hard drive by selecting "Click here" on the Honeywell Wingman Services site. Save it on your desktop.
- 2) Double-click on the GPS Database Loader icon on your desktop and follow the prompts to install the program. After installation, you can delete the **SETUP15.EXE** file.
- 3) To start the program, select **Start → Programs → GPS Database Loader**.

**Note:** The GPS Database Loader program can be uninstalled by simply selecting: **Start → Settings → Control Panel → Add/Remove Programs → GPS Database Loader**.

- 1 **KEY NUMBER:** You need a key number, which is unique to your GPS, in order to download a database. Turn on your GPS unit and copy down the database key number found on the SET 0 or SET 3 pages. If the key number is not displayed on your GPS unit (as with the KLX 135A,

KLN 90 and KLN 90A), you will need to use the GPS Database Loader program to read the database key from the unit. If your GPS unit does not display the database key number, your GPS unit's operating software may need to be updated. See **FAQs** for more information or contact us. Do not try to download a GPS database without a database key number.

- 2 **SET UP:** Set up a user ID and password on the Wingman Services Web site. (If you are a member of the Bendix/King Pilot's Club, you may log in with the same user ID and password.)
- 3 **LOG ON:** Log on to the Wingman Services Web site by entering your user ID and password. Go to the Downloads page, follow the steps to set up a new subscription and then download the GPS database file to your PC's hard drive using the GPS database key number. Please note the location of the saved file. You may now log off the site and the Internet.
- 4 **START LOADER:** Start the GPS Data loader program on your PC by going **Start → Programs → GPS Database Loader**. Click on the picture of your GPS and select the Database.exe file (in the location you noted previously), and select **Open**. The GPS Data loader program will extract the file and open it.
- 5 **VERIFY:** Verify the Database is the correct cycle and date and that you have the correct Com port selected. Then connect your GPS unit to the Com Port/Serial port of your PC. Click **Start**. The GPS Data loader program will run a "check sum test" to verify the database file is good.
- 6 **CONFIRM:** Make sure your unit is turned on, at the SET 0 or SET 3 page, and connected to the PC. Press the **CRSR** button so **Update Published Database** is highlighted and flashing on the screen of the your GPS unit. Press **ENT** on the GPS unit. The GPS will ask you to approve the estimated load time. Press the **ENT** button one more time. The GPS will erase the old database and download new data. Your PC will display a progress bar.
- 7 **COMPLETION:** Wait until the screen of the GPS says the download is complete and follow the instructions on the screen of the GPS before acknowledging the load process is complete on the PC. After completing the instructions on the GPS unit and the PC, your GPS Database Download is now complete.

**Congratulations – you're done!** If you have any questions or encounter any problems during this process, please call Wingman Services at 800-247-0230 or 913-712-3145.

# shape the future

Join the Pilot's Club, and join the ranks of thousands of pilots shaping the future of General Aviation avionics. Benefits include: a quarterly e-mail newsletter, opportunities to participate in the product development process and Honeywell Bendix/King giveaways.
